

# EXPLOSIVE ORDNANCE DISPOSAL

## 24/7 LAND EOD RESPONSE

**Ramora UK provide UK wide, practical response to incidents involving Unexploded Ordnance (UXO) and explosive articles or substances.**

All Ramora UK Explosive Ordnance Disposal (EOD) response vehicles are fully equipped to deal with the varied and challenging requirements of both large and small scale incidents.

Our highly trained EOD Operators and Explosives Officers are capable of working in any environment, either alongside emergency services or as a stand alone unit.

Teams can deal with large wartime bombs down to fireworks or marine flares

## SUPPORT TO CONSTRUCTION AND SITE DEVELOPMENT

We can supply an EOC Engineer to oversee ground excavation and provide daily safety briefings and UXO recognition advice on sites with potential UXO contamination. If the risk of UXO is likely, Ramora UK's EOC Engineers are appropriately qualified and experienced to provide supervision of trenching or bulk excavations. Alongside constant supervision of the site, our EOC Engineers can also advise the client on UXO related issues and lead on the necessary action in the event of a UXO discovery.

# EXPLOSIVE ORDNANCE DISPOSAL

## MARITIME EOD RESPONSE

### 24/7 Global Emergency Response

Our dedicated Remote Explosive Ordnance Disposal System (REODS) is purpose built for maritime Explosive Ordnance Disposal (EOD). Combining cutting edge technology with highly experienced personnel, REODS can remove maritime Unexploded Ordnance (UXO) and Explosive Remnants of War (ERoW) from pipelines, platforms and the open seabed safely and efficiently and then dispose of the item remotely once in a safe location. The system has been proven operationally to depths in excess of 1000msw and utilises a number of disposal techniques including Low Order options and environmentally friendly solutions.

**The REODS system is held on 24/7 standby for when you need us the most.**

Contact us to discuss our retainer services or see how we can help support your maritime project.

## MARITIME EOD CLIENT REPRESENTATIVES

Our highly experienced client representatives can ensure any UXO or explosive hazard based project is being managed safely, in accordance with best practice/ legislative guidelines and minimise lost project time due to poor advice, impact of poor supplier management or inappropriate safety protocols.
